Forecast for Tuesday 06 Apr 2021

Weather: Clear or sunny intervals and occasional snow showers will give new accumulations of powder snow. Very cold Arctic air and gales will mean a severe wind chill effect with drifting snow on the hills at times. Showers will be lighter and less frequent in the south, over ranges south of Loch Tay and Pitlochry.

Chance of cloud free mountain/hill tops above 800m: Ranging from 50% in north to 80% in south.

Visibility: Occasionally very poor in the snow showers with cloud bases down to 600 or 700m at times in the north. Blowing snow will also hamper visibility. Clear between showers with more prolonged good visibility over southern ranges.

Met Office Aberdeen Meteorologist's View
The very cold Arctic airstream will continue to bring serious winter conditions for early April in the mountains.

Forecast for Wednesday 07 Apr 2021
Weather: Clear or sunny spells and scattered snow showers at first but these will ease off by the afternoon as winds also ease. Some sleet or snow reaching the west late in the evening.

Maximum wind: Northwesterly 25-30mph, gusts 40mph at first, easing Westerly 10-15mph in afternoon, increasing to 25-30mph in evening.

Chance of cloud free mountain/hill tops above 800m: 80% in afternoon.

Visibility: Occasionally very poor at first with patchy cloud down to 600m and a few snow showers. Becoming mainly excellent through the morning. Deteriorating in the west late evening.

Temperature: **Glens:** Minus 3 or 4C rising to 2 or 3C.
At 800m: Minus 6 or 7C rising to Minus 3C.
Freezing level: All levels at first, rising to 300 or 400m during the day.
